PIMP MY GAT - COLOUR SHEET

Terms and conditions.

Prices quoted assume receipt of individual items as indicated on the remainder of this form. Stripping and rebuilding of markers in order to provide the anodizing is available for specific markers. If you require the marker to be stripped and rebuilt there is an additional charge as specified. This service is currently only available on the following markers: 05 Eclipse Ego, 05 Nexus / XSV Ego, All 05 PL Egos, Matrix DM4, Matrix DM5, Matrix DMC, Matrix Proto, Autocockers (by arrangement - additional fee's may apply)
The following notes apply to all items undergoing the stripping / anodizing process.

- All work must be paid for in advance or return of product. Prices do not include return carriage. Turn around is a minimum of a week unless special arrangement have been made. Whilst we make every effort to perfect the colour you are after, we cannot guarantee a colour match. It is notoriously difficult to match new anodising with old, we advise that you send in all parts to be anodised at the same time. We recommend items only be re-anodised a maximum of ONCE. Items that require a tight fit or are currently very loose may not be suitable. Re-anodising is likely to increase the bore size of barrels by approximately 0.001". ALL O-ring / stickers must be removed from parts before submission.
- Neither SlothStuff LLP or Slothball.com can accept responsibility for any parts damaged as a result of the stripping or anodizing process. Exclusions of liability include but are not limited to: Parts falling from an anodizing jig. Over or under stripping of anodizing. Items left inside or on the outside of parts (stickers, O rings etc).Colour mismatch. Items glued or not of aluminum composition.

I have read, and I accept the terms and conditions (tick box)
